SAFETY NOTICE

SEPTEMBER 2026

Security of Firearms

This safety notice is being provided as a timely reminder to all Members regarding the required security measures needed when travelling with or transporting firearms to and from the range.

General guidance: Firearm transport and storage laws will vary across states and territories. It is critical to comply with your licence conditions and the current rules in every jurisdiction you enter. Some good practices include:

- Ensure every firearm is unloaded before transport.
- Keep firearms locked, secured, concealed and inaccessible to unauthorised persons.
- Store ammunition separately in a closed or locked container where required.
- Do not leave firearms unattended in a vehicle unless permitted by law and all prescribed security measures are met, including the vehicle being locked.
- Report any loss or theft immediately to range operators (if loss or theft occurred while on the range), police and the relevant firearms registry.

Important: Requirements for firearms transport and security may differ in the ACT, New South Wales, Northern Territory, Queensland, South Australia, Tasmania, Victoria and Western Australia. Check current police or firearms-registry guidance before travel. This notice is general safety guidance, not legal advice.
